## Objective

Detail-oriented professional with proven communication and creative thinking skills. Aiming to leverage my abilities to successfully fill the Software Developer role at your company. Frequently praised as focused by my peers, I can be relied upon to help your company achieve its goals

## Professional Experience

### NFF

**April 2016 - Present**  
**Software Developer**

- Standardize software development best practices within the company.
- Generate web service requests through JSON, and parsed the responses.
- Creates interactions from scratch using wireframes for the UI, and parameters from client for the functionality.
- Creates JavaScript modules to be used with BootStrap to speed up development.
- Implements a large part of the UI dynamic functionalities using CSS3, HTML5, jQuery, jQuery UI, Ajax, JSON, and XML.
- Evaluates new technologies. Added Angular 6, and Node as new technologies to be used in different projects.
- Develops back end (Ruby on Rails) and front end (Angular) parts for new Ledger application.
- Fix software bugs via Javascript and CSS.
- Creates cucumber scenarios to test behavior of applications

### Social Driver

**March 2015 - April 2016**  
**Software Engineer**

- Devised solutions to expedite the procurement of required data for unique website architectures comprised of X/HTML, JavaScript, jQuery, CSS, and AJAX.
- Utilized MVC principals to ensure a clean architecture and a lean code base.
- Maintained close communication with UI/UX team to enhance product quality.
- Fixed software bugs via Javascript and CSS.
- Presented solutions to the client when they want out of scope issues to be solved.
- Gathered specs from client to create a feasible workflow.

### Northrop Grumman

**September 2012 – March 2015**  
**Cyber Software Engineer**

- Coded and tested new interfaces, features, and functionality for Rails-based application.
- Configured endpoints to suit new features and data from front-end.
- Converted legacy systems built with Cold fusion over to open source Ruby on Rails framework.
- Lead the development of four projects using the Ruby on Rails framework.
- Assisted in structuring and developing the main UI.
